

Attention !

Design Managers, Production Chiefs, SME Business Owners

Here is an urgent message !!

Are you training Engineers and running Operations ?

Do you have time to do both - Effectively ?

Free yourself from training chore
Get our help. Send your Engineers to our Training Courses.

Practicing Engineers often have gaps in their knowledge base.
We help them close the gaps. And arm them with sound competencies.

Please call : +91-8050952227 or e-mail : hr@juniperengg.com for more information

**Competent Engineers must be good at basics
In Manufacturing.....Design.....CAD.....Quality
Get your Engineers trained to be competent**

Basics

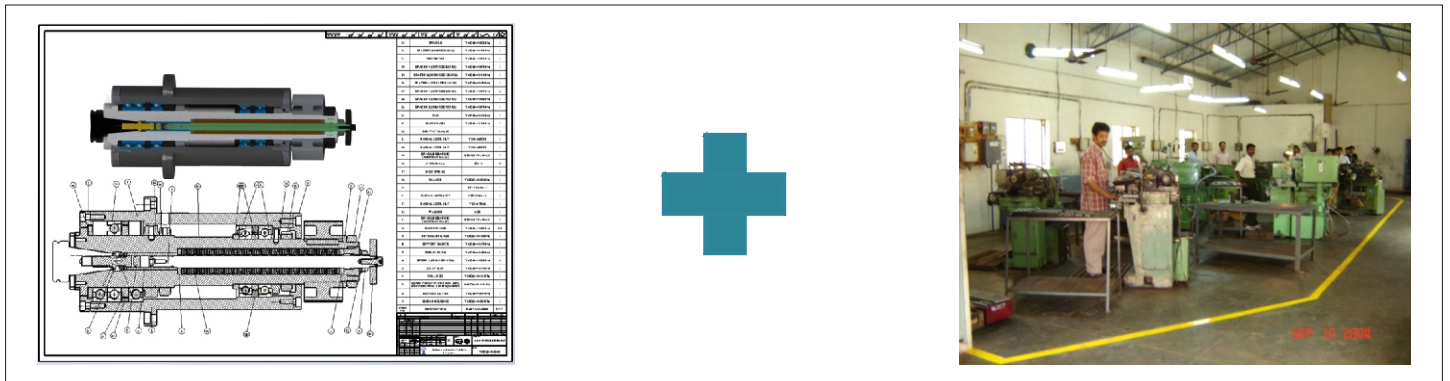

Manufacturing

- ✧ Engineering fundamentals
- ✧ Materials for manufacture
- ✧ Metal cutting processes
- ✧ Non-Conventional Manufacturing processes
- ✧ Limits, Fits, Tolerances & Surface Finish
- ✧ Geometric Dimensioning & Tolerancing
- ✧ Engineering Measurements

CAD

- ✧ SolidWorks basics and user interface
- ✧ Parametric Modeling and Drafting
- ✧ Modeling of Casting / Forging/
Sheet Metal Part
- ✧ Assembly Modeling
- ✧ BOM generation
- ✧ e-drawing for Parts and Assemblies

Design and Manufacturing are getting integrated Engineers need to be cross trained We make your Engineers shop smart and design savvy

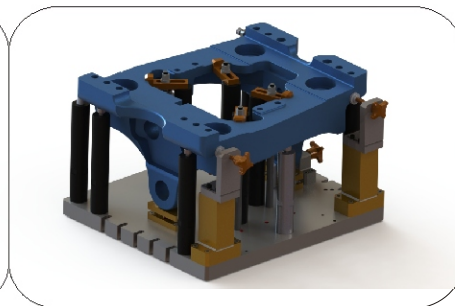

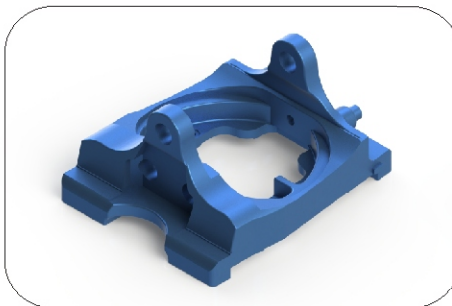

Focus - Design and Manufacture

Course focuses on -

- ✧ Manufacture integrated with Design
- ✧ From Material selection to Processes
- ✧ Inspection to Quality Assurance
- ✧ From Machining to Assembly
- ✧ From Parts to Products

Company-specific / Domain-specific course
For exact skills, knowledge and competencies you need
To fine tune your Engineers' proficiency for maximum Performance

Company / Domain specific courses -

- ✧ supplement our Standard Training Course
- ✧ are developed to your - Standards, Processes, Systems and Products
- ✧ cover any one of the domains - Parts, Jigs & Fixtures, Machines and Machine Tools
